Student/Graduate Employment

Williams & Associates (W&A) will be hiring an seasonal or entry-level employee staff starting in late April or May. We are looking for candidates with a combination of mainstream forestry and urban forestry interest.

W&A works in many aspects of forestry and urban forestry for private and public landowners. Forestry work includes developing and implementing all aspects of Forest Management Plans, forest/tree health surveys and management, invasive pest management and harvest planning and monitoring, and regeneration. We support municipalities in urban forest planning, and forest conservation By-Law enforcement.

In Urban Forestry, we work for municipalities and private landowners conducting tree assessments and inventories, tree/forest health management, arborist reports, woodland parks management and urban forest management planning.

Property maintenance, tree planting Christmas tree management activities are also be required.

Please contact me if you have any questions, suggestions or require additional information.

For Background, I would encourage interested persons to check out our website (address above).

Thank You,

Pete Williams
