

# Master of Urban Forestry Leadership Capstone Course Approval Form

The MUFL Capstone (UFOR 531) course ties together the concepts and skills students have learned to date and provides an opportunity to apply those skills in a project-based learning experience. Students will work with their faculty mentors to review, revise as necessary, and implement their project proposals developed in FCOR 599 (Project Proposal Development and Proof of Concept). The Capstone course may take a variety of forms, as long as the project proposal is approved by the Program Director and students' faculty mentors. Students are encouraged to find an external partner early in the first term and to work with them to develop the project proposal and implement the project during the capstone period.

**Student Name:** \_\_\_\_\_

**Name of Placement/Partner Organization:** \_\_\_\_\_

**Course #:** UFOR 531

**Credit value:** 6

**Academic Year:** 2021/22

### Learning Outcomes

By the end of this course students will be able to:

- Apply the skills and knowledge developed in previous terms to an urban forest-related project
- Manage a defined urban forest project within a set time frame
- Collaborate effectively with others
- Communicate project outcomes in both written and oral formats

### Project Description (to be completed by Student and up to 200 words)

### Deliverable and Evaluation (to be completed by Employer and up to 200 words)
