

Submit to the Forestry Graduate Office *in advance* of starting the work. Once approved the student will be registered in an appropriate DS course code.

A directed study permits graduate students to pursue a previously studied topic in greater depth. It may also be used to substitute for a traditional course that is not offered. A content outline (see below) must be developed through consultation between the student and the instructor or supervising faculty member, to suit the needs and interests of the student and the special competence of the instructor.
